Meins Consulting S.L.U., hereinafter MEINS, is responsible for designing, evaluating and permanently reviewing the Governance and Sustainability System and, specifically, for approving and updating corporate policies, which contain the guidelines that govern the actions of the Company.

In the exercise of these responsibilities, and aware that quality is and has been one of the fundamental pillars of MEINS throughout its history, with national and international recognition, both for its professionals and for the quality of its services. MEINS approaches the Integrated Quality and Environmental Management System as a way to organize its business life, basing it both on its orientation towards customers and towards its products and services, and based especially on the continuous improvement of the effectiveness of its quality management system and customer satisfaction.

1. PURPOSE

The purpose of this Quality Policy is to establish a reference framework to integrate quality standards, current legislation and improvement in the strategy, investments and operations established at MEINS level and to define the principles of action for the quality management system.

MEINS considers quality as a transcendental element to achieve the objective of ensuring that products meet customer requirements and expectations, as well as relevant standards and regulations, so that it can develop in line with the vision and mission of the company. Therefore, MEINS is committed to strengthening its system in procedures related to quality management, thereby contributing to the achievement of the seventh, ninth and twelfth Sustainable Development Goals (SDGs) approved by the United Nations (UN).

In addition, MEINS is committed to compliance with quality regulations and established international best practices in this area.

2. SCOPE OF APPLICATION

This quality policy applies to all activities carried out by MEINS.

The MEINS quality policy defines the commitment to carry out our activity to develop the activities of Meins to strengthen the competitiveness of the energy products and services supplied through efficiency in the activities carried out, paying special attention to the excellent management of processes and resources.

It also establishes a common framework for the definition of objectives and the implementation of activities that contribute to the continuous improvement of the quality management system.

3. PRINCIPLES OF ACTION

At MEINS we are committed to providing high quality products that meet the highest standards of safety, efficiency and regulatory compliance.

To meet the commitments of our Quality Policy, we articulate the following basic principles of action, which apply to all our activities and businesses and will be integrated into our internal decision-making processes:

- Quality drives us, in order to stay in a competitive position, to pay the utmost attention to new products, with the highest quality in the market. We strive for excellence in all our products from manufacturing to delivery. We strive to maintain quality at every stage of the process, promoting a safe and collaborative work environment.
- Risk and impact management by establishing objectives, programs and plans that promote continuous improvement of quality processes and practices, as well as the establishment of monitoring, control and auditing mechanisms. We promote a culture of continuous improvement in all aspects of our organization, identifying opportunities for improvement and applying corrective and preventive actions proactively to ensure the excellence of our products and processes.
- Quality is achieved by planning, executing, reviewing and improving the Quality Management System and preventing possible errors.
- The quality is oriented towards the satisfaction of all our clients by means of its personalization, looking for the direct treatment to achieve that the services offered are the ones that are really required. All our workers must have a great knowledge of the service they perform. It is the responsibility of the entire organization, to meet the needs and requirements set by customers, meeting both the delivery period, as well as legal and regulatory requirements related to production and product / service and environmental performance.
- Compliance with regulations and adaptation to current standards applicable to our manufacturing, ensuring the safety and efficacy of our products for their use.
- Promote innovation through research and support for the development of new technologies and best practices through the utilization of MEINS' resources.
- Raise awareness, train and involve all MEINS employees, as well as members of the supply chain and other stakeholders, in the commitments and principles of this Policy.

This quality policy establishes the company's fundamental principles and commitments with respect to product quality, customer satisfaction, continuous improvement and other key aspects related to quality and regulatory compliance.

4. MONITORING AND DISSEMINATION

Compliance with the guidelines contained in this document will be monitored by management either through a regular meeting or in the course of the normal working day.

This quality policy is communicated, implemented and maintained throughout the organization, and is reviewed periodically to ensure its adequacy and effectiveness in achieving our quality objectives.

Communication or dissemination: procedure for escalating and reporting events and how business areas communicate on risk management.

Via: Web, mail, bulletin board and initial documentation given to the employee.

5. APPROVAL AND UPDATING

This Policy was initially approved by the Management Committee on 09/05/2024 and last modified on 09/06/2025.

This Policy shall become effective on the next business day following its approval by the MEINS Management Committee. It shall remain in effect until amended or repealed by a later policy.

Exceptions to the provisions of this policy will be addressed and approved by the MEINS Management Committee.

From its entry into force, there will be three months to adapt the incompatibilities with the provisions of this document that may exist in other rules, both global and local.

This document will be reviewed periodically and according to the organizational, legal or business changes that occur at any time, in order to maintain its relevance, adequacy and effectiveness. In the event of changes to it, these will be communicated and published in the same manner as this policy.

This policy is available to all employees and on the corporate website for all the Company's stakeholders.
